- Managed a team of eight and responsible for hiring
- Responsible for \$500,000+ of product in fermentations

SKILLS

JavaScript

React.js

HTML

CSS

Rails

SQL

Git/GitHub

PROJECTS

Live, Laugh, Lager

Allows users to review beers, create posts, and find breweries with a third party API. Made with React.js and Rails.

Family Talk

Group project that is similar to Pinterest. Allows users to create boards, posts within the boards, ability to like and comment on posts, and the option to follow boards. Made with React.js and Rails.

DnD Characters

Hackathon 2 project that stores a user's Dungeons and Dragons character and equipment. I completed all backend work. Made with React.js and Rails.
