Summary

Performance driven and motivated software developer with a diverse skill set. Passionate about designing products from the back end to front end. Superb communication and strategic planning skills from four years of brewery management roles.

Skills

JavaScript   React   HTML   CSS   Ruby on Rails   SQL/PostgreSQL   Git/GitHub

Projects

LIVE, LAUGH, LAGER - PERSONAL PROJECT

A web based application that allows users to review beers, create posts, and find breweries with a third party API. Reviews and posts have all CRUD actions. A user can also follow other users to see their reviews and posts. Made with React and Rails.

DUNGEONS AND DRAGONS CHARACTERS - HACKATHON PROJECT

This started as a hackathon project which I then polished. It is a database of Dungeons and Dragons characters that displays a specific character's statistics and inventory when selected. I completed all API calls and wrote SQL in Rails to complete these calls. Made with React and Rails.

Experience

HEAD BREWER, STRAP TANK BREWERY; LEHI, UT - 2018-2020

- Managed scheduling, inventory, and implemented ERP software for two locations.
- Improved bottling yields by 8%
- Created and led beer education courses for pub staff
- Created Standard Operating Procedures (SOPs) for all processes

QA/R&D MANAGER, UINTA BREWING COMPANY; SALT LAKE CITY, UT – 2017-2018

- Collaborated with multiple departments to implement a food safety plan
- Created and presented weekly KPI reports
- Created laboratory SOPs and training logs for laboratory personnel
- Managed a team of three and responsible for hiring
- Developed over 10 new products to be distributed nationwide

BREWING SUPERVISOR, UINTA BREWING COMPANY; SALT LAKE CITY, UT – 2016-2017

- Led the Brewing Department for seven months until a Brewmaster was hired
- Managed a team of eight and responsible for hiring
